SELF-DUMPING CAKE HOPPER

M.W. Watermark can provide a self-dumping cake hopper (also known as a dumpster) for almost any size press for easy handling of discharged solids. The hoppers are furnished with large ball-bearing casters for easy positioning under the presses, either manually or by using a lift truck. When filled, the operator picks up the hopper using a fork lift truck and positions it over a larger container. It's emptied quickly and easily by pulling the spring-loaded self-dump pin.
