

## SOLAFT™ AirSlide

For over 45 years SOLAFT™ has been an innovator in developing AirSlide fabrics for fluidised bed transfer systems. During this time we have not only met industry expectations, we have raised the standard for AirSlide fabrics for a wide range of industries including:

- Alumina
- Cement
- Coal Processing
- Minerals Handling

Our success is based on our vertical integration, from yarn to finished product, and the technical expertise and vast experience of our staff. This has led us to develop a range of needled AirSlide fabrics specifically designed to provide superior performance and durability compared to traditional woven fabrics.

SOLAFT™ AirSlide fabrics have been developed for a broad range of materials and service conditions and we work closely with our customers to tailor custom solutions using a range of Polyester and Aramid yarns to meet your specific needs.

The advantages of the SOLAFT™ AirSlide system over our competitors include:

- Extremely easy to handle, SOLAFT™ AirSlide can be cut, machined or punched with standard tools.
- No need for silicone or hot knife for sealing as edges and punched holes are virtually self sealing
- SOLAFT™ AirSlide is guaranteed not to fray or rot ensuring trouble free processing and longer life
- Reduced energy consumption due to less pressure differential required across the fabric
- SOLAFT™ AirSlide is chemically treated to reduce blinding resulting in consistent permeability over an extended service life
- Excellent abrasion resistance for longer life

Our experience has proven we deliver value in all parts of the process, from developing products that improve productivity and reduce costs, to working with our customers on supply and maintenance schedules to ensure the smooth operation of the plant and reduce downtime.

### Experience the SOLAFT™ Difference

- ✓ Vertically integrated manufacture from yarn to finished product
- ✓ Proven longer filter life
- ✓ Local manufacture for fast turnaround
- ✓ Full maintenance service options
- ✓ Technical support on hand when you need it
- ✓ Continuous optimisation of filter performance
- ✓ 100% Australian owned and operated

*Filtration solutions you can rely on*
