

Metals and Smelting Industry Filtration Solutions

SOLAFT™ has been a major supplier of premium filtration to the metals and smelting industry since 1966.

Our success is based on our vertical integration, from yarn to finished product, and the technical expertise and vast experience of our staff.

We have developed a broad range of high performance filter media to withstand the harsh environment and meet our customer's specific requirements including:

- Belt Filters
- Filter Bags
- Disc Filters
- Drum Filters
- Plate and Frame Pressure Filters

Our solutions are available in a range of polymer types from low temperature Polyester through to high temperature Polyphenylene Sulfide (PPS) fibres and patent designed finishes to provide the optimum performance for our customers needs.
