TECHNICAL DATA

• Concept :

The DP range of submersible pumps with agitator has been specially designed to handle heavy and abrasive slurries.

These centrifugal pumps with closed impeller, feature a unique agitator design. This agitator lifts sediments into suspension, creating a slurry mixture. This enables the continuous pumping of media with a high concentration of solids.

Robust construction, careful selection of materials and unique contour components, coupled with a low speed high torque motor, have produced a pump with excellent abrasion resistance as well as a sufficient weight and an important torque. These characteristics ensure long service life and economical operation.

The impeller, the wear plates and the agitator are manufactured in cast chrome iron (24 to 28 % Cr).

A strong short shaft, supported by a series of carefully selected bearings and a system of seals on double level of protection functioning in oil bath, ensure tightness in the hardest of conditions.

The DP15~150HP pumps are equipped with a series of lip seals in standard. They can be equipped with a double mechanical seal in option.

Servicing and maintaining the pumps to keep them in good working order is easy. On the DP pumps you have two wear plates, one of which is adjustable allowing simple adjustments to maintain long lasting high performance.

The electric class F motor is cooled by the liquid in which the pump is submerged.

The DP15~150HP pumps are available in different metallurgies, with thermal protection and moisture detector as well as in special versions for high temperatures or depths.

• Operating conditions :

DP15~150HP pumps can handle slurries with solid content of up to 60 % by weight, particle sizes up to 120 mm and liquid temperatures up to 60°C with pH levels between 4 and 9,5.

Special versions are available for liquid temperatures up to 80°C. Maximal standard operating depth is 30 m and 120m in special versions.

• Electric power requirements* :

Pumptype	Power kVA	Amp. 400 V
DP15/B	30	24
DP20/B	40	32
DP30/B	50	46
DP40B	65	58
DP50/B/BL/H	80	75
DPS50S	80	61
DP75B	120	116
DP100B/BL	150	150
DP150/L/B	220	215

*These figures are given as an indication.

• Electric cable :

The standard cable type to be used for connecting the pump is HO7RN-F and its specifications should correspond to the following :

Pumptype	Section	Outer diam. mm	Max. lenght cable/m/400V
DP15/B	4 x 10 mm ²	23	170
DP20/B	4 x 10 mm ²	23	120
DP30/B	4 x 16 mm ²	27	140
DP40B	4 x 35 mm ²	37	260
DP50/B/BL/H	4 x 35 mm ²	37	200
DPS50S	4 x 35 mm ²	37	250
DP75B	4 x 35 mm ²	37	130
DP100B/BL	4 x 50 mm ²	43	130
DP150/L/B	4 x 95 mm ²	58	170

• Starter :

A reactor starter must be used to start DP15~150HP pumps.
