

Cement Industry Filtration Solutions

SOLAFT™ is a trusted supplier of premium filtration and AirSlide media to the Cement Manufacturing Industry.

Our high efficiency Filter Bags and AirSlide fabrics are used across a wide range of processes including:

- Cement kilns
- Clinker coolers
- Calciners
- Raw mills
- Finish mills
- Material handling
- Product bagging systems

Our success is based on our vertical integration, from yarn to finished product, and the technical expertise and vast experience of our staff gained over our 45 year history.

Working closely with our customers we specialise in developing and manufacturing high performance filtration media specifically engineered to optimise your processes.

Filter Bags

SOLAFT™ has developed a wide range of needled and woven Filter Bags to withstand the harsh environments in Cement Plants. Using an array of standard and micro-fibres, they are designed to meet your exact needs and the requirements of both the industry and the EPA.

AirSlide

Our range of highly durable AirSlide fabrics for fluidised beds ensures the effective transfer of material throughout your plant. SOLAFT AirSlide can be engineered using three Polyester and two Aramid yarns to meet your specific needs.

Our experience has proven we deliver value in all parts of the process, from developing products that improve productivity and reduce costs, to working with our customers on supply and maintenance schedules to minimise downtime.

Experience the SOLAFT™ Difference

- ✓ Vertically integrated manufacture from yarn to finished product
- ✓ Proven longer filter life
- ✓ Local manufacture for fast turnaround
- ✓ Full maintenance service options
- ✓ Technical support on hand when you need it
- ✓ Continuous optimisation of filter performance
- ✓ 100% Australian owned and operated
